Attention:
Employees Supporting the CTF Environment

By federal mandate, we are beginning a rollout of a Federally optimized version of the Firefox for all employees connecting to the CTF environment. This version comes with numerous security improvements and requires Onelogin to secure your browsing session. Use of this specialized version IS REQUIRED for all employees. Ensure the following instructions are followed before 10AM TODAY to avoid a high risk finding on our upcoming audit. The security management team will be taking appropriate action for users who do not complete this in a timely manner.

1) *Download Firefox_Fed here*

2) *Double click the downloaded .DMG file to open it*

3) ***DO NOT*** *copy Firefox_Fed to your Applications Folder at this time,* ***RIGHT CLICK*** *Firefox_Fed and select "**Open**" to launch it*

4) *CLICK CANCEL on the developer verification notice, (Note: We're still waiting for Apple to approve our signing certificate, this will be resolved in future releases)*

5) *RIGHT CLICK Firefox_Fed and select open, then click "Open" on the prompt stating the developer is unknown.*

6) *You'll be prompted for your Keychain password, type it then with no space, add your MFA token from the Onelogin app. (Yubikey integration is coming!!)*

7) *The application should launch but if it doesn't, please press the "IT FAILED" button below and the relevant diagnostic information will be forwarded to the development team.*

IT WORKED!!   IT FAILED!!!
